Think of a time when [the issue regarding housing was in the news](#) in your community.

Extra Questions

Housing : 집

Adv 지난 5년-10년간 주택 변화 비교

How has the style of homes changed over the past 5 or 10 years

at where you live? Are the homes being built today different from the homes built 10 years ago?

What developments or changes have you noticed?

1. 가장 좋아하는 방

Well, there are many places at home where I can spend some quality time. Among them, there is one room which is definitely my favorite. One of my favorite rooms is my bedroom because I can do so much there. I usually watch TV, read books, and I can even eat while getting ready for work. I can do almost everything in my room. My favorite thing to do is probably lying on my bed and being lazy because it's so comfy and cozy. I especially like to chill out and watch movies at night. Also, I like having some privacy. After a long day at work, I often enjoy being alone, and my bedroom is definitely the perfect place for that. So, that's why I think my bedroom is the best place in my house.

2. 집에서 하는 일과/청소 방법

I have been so busy at work these days, so I don't like to go out that much. I'd rather stay at home and do other activities. Due to the outbreak of COVID-19, many people, including myself, tend to spend their free time at home.

I like to clean up the house when I get some time off. First, I open all the windows.

Next, I vacuum and mop the floors. It usually takes about 20 minutes to do that.

Dusting the furniture is also something I try not to forget when it comes to cleaning the living room. After that, I usually clean the bathroom. I spray water on the floor and

wash the toilet. I like to keep my bathroom clean. When it's done, I also do the laundry from time to time. I usually separate the whites and the colors and put them in the washing machine. I've been so busy at work these days. So, I can do the house chores only when I get some time off.

That's how it is. These are what I usually do when I am at home.

3. 집에 준 변화에 대해 묘사

I don't have a particular experience of changing something at home, but the only thing I remember is when my mom decided to remodel the kitchen. Because we have been living in the same place for many years, the kitchen was getting old, and my parents wanted to do something about it. It took some time to pack up. As the construction started, we ended up finding some old pots and pans that we didn't even know we had.

Because of the construction, we had to eat out almost every day. My parents and I had to leave the house for that time. The project took almost two weeks to finish, but it was worth the wait. Everything in the kitchen was brand new.

That's it. Once again, I'm happy because my parents decided to redo the kitchen.

4. 어렸을 때 집과 지금 집 비교

I remember when I lived in an apartment complex as a child. I used to hang out with my neighbors all the time. Because I lived in a rural area, there were large rivers and lots of mountains close to my house. But now, things have changed a lot. I still live in an apartment complex, but it's a bit different from the place I grew up. Both are apartment complexes, but my new one has a great city view. My favorite thing to do is having a bottle of beer while enjoying the view of the city. Drinking a bottle of beer while enjoying the view always helps me relieve my stress from a daily life. Plus, public transportation is accessible, so moving around has become a lot easier than the past. I can just walk out and take the subway in five minutes. Because of the location of my house, my average commuting time has reduced. Overall, I enjoy living in apartment complexes, both in the countryside and in the city.

5. 우리나라 주택 시장 문제 관련 뉴스

Well, I can't think of anything right now, but the only thing I remember is watching the news about the housing market in Korea a few months ago.

It was about rising housing prices which has been an ongoing issue for several years. The housing prices have been skyrocketed for years. Because of this, the rent prices have also risen a lot. Due to this issue, people have a lot of trouble finding a home. It's hard to find a house at a reasonable price. So, the government came up with some policies to curb housing prices. Unfortunately, it seems like they are not always effective. In fact, they sometimes backfire and the housing prices go up again. Because of this, many people gave up on buying their own house these days. They don't want to spend the rest of their life trying to pay off the mortgage. Well, I guess the housing price is definitely one of the biggest issues in Korea.
