Adv 패션 아이템에 관련된 사람들의 이슈

What are some issues people talk about related to fashion items in your country? Why did they become an issue?

☆ 1. 우리나라 사람들의 패션

To be honest, it is very hard to describe how people dress in my country because Korean people are very fashion-conscious. People normally wear different types of clothes depending on the situation. Because of this, there are plenty of fashion brands that people like to wear.
= depending on what they need

During the weekdays, most people wear business attire because of the dress codes the companies have. Normally, most companies have their own dress codes, so it is proper to wear professionally. However, when people don't go to work on weekends or when they have some days off, most people wear casual clothes. People love to wear jeans, shirts, or even sweats. People love to wear whatever is comfy. I guess that's it. Once again, people normally wear different types of clothes depending on the situation.

☆ 2. 과거와 현재 패션 비교

Fashion trends have changed a lot over the years. As far as I remember, people used to wear whatever is comfy/fast. People didn't care that much about what they wore. But now, things have changed.

As I mentioned earlier, most Koreans are very fashion-conscious these days. Fashion starts on TV or magazines. Since we have the Internet, most people are easily influenced by the media and what they see on TV or magazines. That's why people are interested in what celebrities wear. Paparazzi shots are always popular for magazine readers. If people find something they like on TV, they just go buy them. The product easily becomes a must-have item once it appears on TV. In my case, I read magazines all the time and choose the items from the magazines. Everyone has their own unique fashion style that they want to follow. That's it. Once again, the fashion trends have changed a lot over the years.

3. 쇼핑 경험/기억에 남은 인터넷 경험/구매 실패 경험

When it comes to shopping, I don't like spending time walking around shopping malls. So, I prefer shopping online. Not only that, because of my busy work on weekdays, I try to spend more time with my kids on weekends.

Well, I remember when I shopped online a month ago. I was planning to travel to Japan for my family holiday. I wanted to buy something for the trip. I bought a pair of jeans, a blue sweater, and even a hat. The shipping was pretty fast. However, everything I got was little different from what I expected. I was very disappointed. There was nothing I could do. So, I called the customer service and got helped. The thing was the line was busy the whole time, and it took me a long time to get connected.

Fortunately, I could talk to the customer representative (rep.) and decided to get an exchange/get a refund/keep the items. I felt like I got ripped-off. It was not worth the money. Since then, I try to be more careful when I buy something online. I decided to read all the reviews from the previous customers and it helps me make better decisions when I buy something online. I can avoid buying things that are different from my expectations. It was definitely one of the most memorable incidents I have ever had while shopping.
