Bank : 은행

Int 은행 묘사

Let's talk about the bank you go to. Where is it located and what is it like? What do you do from the moment you walk into the bank till you walk out? How are the people who work at the bank? Tell me everything that goes on when you visit the bank.

Adv 은행에서 발생했던 문제

Problems can occur when you're at the bank. Perhaps you could have forgotten to bring your ID. Talk about a problem you've personally had at a bank. What happened and how did you solve the problem?

Adv 은행의 변화

Banks have changed over the years. How do banks look different than they did in the past? What kinds of changes are the most evident? What kind of impact have those changes had on the customers? Give me all the details.

1. 은행 묘사/은행에서 하는 업무

Banks are normally on busy streets with a lot of foot traffic. I usually go to the one that is close to my house. It takes only a few minutes from where I live, so I usually go there when I need something.

I normally go to the bank when I need to withdraw, deposit, or pay my bills.

There are always a lot of people, so it takes a long time to take care of my business.

Because people can easily do online banking these days, they don't go to banks

that often compared to the past. However, every time I go to a bank, there are

a couple of tellers who always greet me with a smile, so I feel welcome when I get

helped. I also go to the bank when I need some cash. I can see a couple of ATMs

at the bank and there are always people lined up. That's it. Overall, I usually go to

the bank that is close to my house.

2. 은행에서 발생했던 문제

I don't remember a particular experience at a bank. I never had any problems while taking care of my business at a bank. The only thing I remember is when I met a drunken guy at a bank. I once went to the bank close to my office during my lunch hour. It was full of people.

One guy came into the bank and started to talk to himself very loudly. It was easy to tell that

he was pretty drunk. I mean, wasted. A guard tried to talk to him and make him leave the

building. However, he kept talking loudly and started to talk to the customers who were

waiting for their numbers to be called. I didn't think he would leave any time soon.

Eventually, I decided to leave the bank. I don't know how he got so drunk during the

daytime. Ever since then, I try not to be around people who are drunk even at night.

I think people should keep in mind that public manners matter. Well, that's it. This is

the only thing I can think of at the moment.

3. 은행의 변화

The banking system has changed a lot in the last few decades. I used to go to banks in person when I needed something. However, things have changed a lot. As I can get access to the Internet with my cell phone whenever I want to, I don't have to go to banks any more. I can check my balance, transfer, and even pay my bills online.

Plus, I can take care of my banking business through the online banking.

I don't have to carry around cash when I go to restaurants and split the bill with my friends. I can just transfer the money on the spot.

The only time I go to a bank is to withdraw money from the ATM machine.

Once again, the banking system has changed a lot in the last few years.
