Unexpected things can happen on trips. Talk about an unforgettable incident that happened on a trip. Why was the experience so memorable? Give me all the details.

## Magic template

## 1. 좋아하는 국내여행 장소

가

I like traveling to Busan which is a famous vacation spot in Korea. It's like Florida in the US. I normally take the bullet train called 'SRT.' It usually takes about 3 hours to get there.

There are a lot of places to eat and drink near the beach. The beach in Busan is one of the most famous beaches in Korea. I also enjoy the coastline of the area because it's very scenic. The sunsets and sunrises by the beach are very beautiful and breathtaking. I usually swim in the ocean and set off fire crackers at night. I like to drive along the coastline and have some seafood near the beach. Well, that's it. That's all I remember for now.

## 2. 국내 여행 과거/현재 비교, 어려워진 점

Well, the way people travel has changed a lot over the years. However, I don't think it has become more difficult than the past. I used to spend over 5 hours to get to my uncle's house which is in Busan. But, since the bullet train reaches almost everywhere in Korea, it shortens the travel time. It only takes about 3 hours to get to Busan these days. Not only that, driving has become much easier because we have GPS and it helps us get to our destinations without any delay. As a result, people can easily go to the places they want. We don't need paper maps any more. That's it. I have to say that traveling has become much easier than the past.

cf) I would say ~

## 3. 여행 관련해서 사람들이 갖고 있는 우려/걱정, 어떻게 대비하는지

People in Korea enjoy traveling abroad. They always think about a nice getaway from the city when they get some time off. However, there are some difficulties people face when they travel to other countries. <sup>+) ~ because of the outbreak of the COVID-19 ( )</sup>

I think the language barrier is the biggest one. Since it's hard to communicate with locals, it can be hard to find the places you want to go or find the food you want to try.

Another problem is the market price. Every country has a different market price. So, it's easy to get ripped-off if you don't know the exact market price of that country.

Well, that's it. <sup>가</sup> These are probably the difficulties people can have when they travel abroad.
