☆ 1. 쇼핑 습관 / 장소 묘사

Most shopping malls are usually on busy streets with a lot of foot traffic because it's much more convenient for shoppers. When it comes to shopping, I usually shop for new clothes in my free time. It seems that fashion changes very quickly in the city where I live, and I like to have up-to-date clothing. For me, shop A and shop B are the best places to shop for new clothing because they always have the most fashionable items in stock. I have a lot more options to choose from at those stores. When I go shopping, I usually go with my best friend. Since we get our paychecks on the same day and can have days off at the same time, it is easy to go shopping together. We also have the same tastes when it comes to clothing. Well, that's it. I often go shopping with my friend in my free time.

2. 쇼핑 중 겪은 개인적인 문제, 해결 방법

I have been so busy these days, so I had no time to go shopping. Instead, I decided to shop online. (Because of the spread of COVID-19 or pandemic, I don't like to walk around while putting my mask on.) I remember when I shopped online a month ago. I was going to travel to Japan to visit my friend. I wanted to buy something for the trip. I bought a pair of jeans, a blue sweater, and even a hat. The shipping was fast. However, everything I got was little different from what I expected. I was very disappointed. There was nothing I could do. So, I called the customer service and got helped.

The thing was the line was busy the whole time, and it took me a long time to get connected. Fortunately, I could talk to the customer representative (rep.) and decided to get an exchange/get a refund/keep the items. I felt like I got ripped-off. It was not worth the money. Since then, I try to be more careful when I buy something online. (It was definitely one of the most memorable incidents I have ever had while shopping.)

3. 사람들의 쇼핑 습관 관련된 가장 큰 변화

The way people shop around has changed a lot. I think the most noticeable change is online shopping. Since everyone is busy with their lives, people don't find the necessity to go shopping. Instead of spending the whole day at the mall, you can easily shop online with your phone. In fact, since the whole world was attacked by the pandemic, people are afraid of going to the public areas. It's mandatory to wear the mask outside.

Also, the price is a lot cheaper when you shop online. Since online store owners do not have to pay the rent, their prices are very competitive. As a customer, you can buy things at cheaper prices if you just pay for shipping.

Well, that's it. This is probably the only thing I can think of at the moment when it comes to shopping.
