## 1. 집에 있는 가구, 좋아하는 가구

Well, there are many places at home where I can spend some quality time and  
there are many pieces of furniture in my house.

Among them, there is one furniture which is definitely my favorite.

One of my favorite pieces of furniture is my bed because I can do so much there.

I usually watch TV, read books, and I can even eat while getting ready for work.

I can do almost everything in my room. My favorite thing to do is probably lying on  
my bed and being lazy because it's so comfy and cozy. I especially like to chill out  
and watch movies at night. Also, I like having some privacy. After a long day at work,  
I often enjoy being alone, and my bedroom is definitely the perfect place for that.

So, that's why I think my bed is my favorite furniture in my room.

## 2. 어렸을 때와 현재의 가구 비교

I have lived in the same house since I was young, but the furniture in my room has  
changed a lot. When I was young, most of the furniture in my room was smaller than now.

For example, my bed had a low frame since I often fell off my bed during the night.

Once, I sprained my wrist from falling off the bed and had to wear a cast for weeks. Also,  
I remember the time when my dad used sandpaper to make the edges of my furniture  
smoother.

I used to scrape my arm on the sharp edges of furniture. One day, my dad decided to  
smooth out the edges so that I wouldn't get hurt anymore.

But now, there is a bunch of furniture in my current room and they are a lot bigger too.

I have a table, a chair, and of course, my comfy bed. I even have an air-conditioner (the  
A.C) in my room now. So, it helps me cool off anytime I want. Overall, these are the main  
differences between my old furniture and my current furniture.

### 3. 가구에 문제가 생겼던 경험

I remember when my family moved into our new apartment in Seoul. We called up a moving company and they moved everything for us. However, after they left, I found out that one of the dressers was broken. Plus, there were scratches all over my desk. I was quite disappointed. I was going to call the company for the repair, but I did not want to complicate things. Eventually, I had to repair it myself. I repaired the damaged parts and painted the scratches with bright colors. Afterwards, it looked brand new and I was very satisfied with what I'd done. Ever since that incident, I don't trust moving companies anymore. Well, that's it. That's probably the only problem that has happened to my furniture.
